DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a semiconductor device including memory cells with trench isolation, classified in class 257, subclass 315.
 - II. Claims 8-20, drawn to a method of making a semiconductor device including memory cells, classified in class 257, subclass 315.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP §806.05(f)). In the instant case, unpatentability of the Group II invention would not necessarily imply unpatentability of the Group I invention, because the device of the Group I invention could be made by a process materially different from that of the Group II invention. For example, the process of claim 8 can be materially altered by substitution of the oxidization of the silicon substrate layer by silicidization of an upper oxide layer using RTA (rapid thermal annealing).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields

Art Unit: 2826

of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

In the event Applicant elects the device rather than the method of making the device this application contains claims directed to the following patentably distinct species of the claimed invention: first Embodiment (Figures 1-5), second Embodiment (Figures 6-10), or third Embodiment (Figures 11-13).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 FR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johannes P. Mondt, whose telephone number is (703) 306-0531. The examiner can normally be reached on Monday-Friday 8:00 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Flynn can be reached on (703) 308-6601. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.
